

Dosage of SWD :->

Duration of treatment :->

More the treatment, higher is the dose vice versa milliampereage indicated by meter. More the wattage, higher the dose and vice versa.

Distance between pads electrodes :->

Nearer the pads higher is the dose.

Dose is product of watts applied and duration minutes. The range of watts selection also depends on the musculature and the depth of pain.

The dose parameter can be change depending on  
on intensity of pain, duration of onset  
and nature of pain.

• In chronic condition

- Intensity comfortable warmth
- Frequency daily.
- Duration 20-25 minutes.

• In acute condition

- Intensity below sensation of warmth
- Duration 10-15 minutes
- Frequency twice a day.
