

Scope of Research

The scope in research refers to the boundaries and extent of a study, defining its specific objectives, target population, variables, methods, and limitations, which helps researchers focus and provide a clear understanding of what will be investigated.

what is SCOPE?

Scope refers to how far the research area has explored and **parameters** in with the study will be operating in.

The type of information to be included in the scope of a research project would include **facts** and **theories** about the subject of the project.

What is scope?

- ✿ It examines the activities of the project in terms of what we are trying to achieve
- ✿ It is about ensuring that the project includes the work required, and only the work required to achieve the objectives
- ✿ More than this, it is about defining and controlling what is **not** included in the project
- ✿ It helps us to avoid over-ambition
