

6 EASY STEPS TO YOUR DREAM KITCHEN

STEP 1

What is your need?

Family Size

This is one of the most important criteria to plan your kitchen. A small family with just husband & a wife can go with a straight lined kitchen with limited storage as per requirement. However, always keep in mind, your family may extend in the future. A medium family of 4 can plan a "L" shaped or a "parallel line" kitchen depending on the space available. A joint family should ensure a "U" shaped kitchen, as it allows enough space for free movement in the kitchen. Plan your storage requirements also accordingly.

(Diagrammatic representation & explanation of the straight lined, "L" shaped & "U" shaped kitchen is shown on page 12)

Budget

To fulfill all your aspirations within a limited budget requires an expert's assistance. At HomeTown we plan your kitchen within your budget while keeping your aspirations intact.

KITCHENS STARTING
Rs. 49,999/-* onwards.
Also available with
Easy Finance Option.

Time

Time is the essence of everything. At HomeTown we value your time and promise to get your dream kitchen ready within a reasonable time frame.

STEP 2

Choose your Cabinets

Combination of base, wall & column units constitute total storage. Handpick your choice of cabinets, ranging from basic shelving units to organised drawer systems. Our kitchens team would make your choice effective by explaining the benefits of each cabinet keeping your need & working style in mind. Remember to strike a balance between shelving & drawer systems. Avoid duplicating choice of cabinets unless its vital, because duplication leads to monotony in usage.
