

# COMPETITIVE SERIES -2

-Dr. Vishal Saxena

## COMPUTER AWARENESS

1. GIGO stands for \_\_\_\_\_:

**Ans: Garbage In Garage Out**

2. The capacity to perform multiple tasks simultaneously is termed as \_\_\_\_\_:

**Ans: Versatility**

3. A computer does not suffer from tiredness and lack of concentration. It is known as \_\_\_\_\_:

**Ans: Diligence**

4. First generation computers used \_\_\_\_\_ for circuitry and \_\_\_\_\_ for memory:

**Ans: Vacuum tubes and Magnetic drum**

5. FLOPS stands for \_\_\_\_\_:

**Ans: Floating Point Operation Per Second**

6. Which language was used to program Second Generation computers?

**Ans: Assembly language**

7. EDSAC stands for \_\_\_\_\_:

**Ans: Electronic Delay Storage Automatic Computer**

8. Third Generation of computers were based on \_\_\_\_\_:

**Ans: Integrated Circuits**

9. Who is the Father of modern computer?

**Ans: Charles Babbage**

10. A \_\_\_\_\_ terminal can display images as well as text:

**Ans: Graphical**

11. The fastest and most expensive computers are \_\_\_\_\_:

**Ans: Super computers**

12. A \_\_\_\_\_ terminal does not process or store data:

**Ans: Dumb**

13. Desktop and personal computers are also known as \_\_\_\_\_:

**Ans: Micro computer**

14. Who coined the term “Artificial Intelligence”?

**Ans: John McCarthy**

15. The chip used in computers, is made of \_\_\_\_\_:

**Ans: Silicon**

16. The first computer language developed was \_\_\_\_\_:

**Ans: FORTRAN**

17. VDU stands for:

**Ans: Visual Display Unit**

18. The most frequently used instructions of a computer program are likely to be fetched from:

**Ans: Cache**

19. The main circuit-board of the system unit is:

**Ans: Mother board**

20. ALU and Control Unit have special purpose locations called \_\_\_\_\_:

**Ans: Registers**
